

## CEILING

# DIRECT MOUNT

## Z - CLIP & CONTINUOUS TRACK

Direct mount ceilings are a great cost effective way to install panels in situations where access is not easily required. Z clip and Continuous ceiling track is a great way to directly mount to many substrates.

### MAIN COMPONENTS

Continuous Track

Z - Clip

### FEATURES

- Concealed Mounting system
- Z- Clips are Pre - installed to panel
- Panels slide into a continuous ceiling Z - track that are fastened and installed on site to a secure and stable substrate.
- Custom shapes, curves , and design returns are easily incorporated into the system.

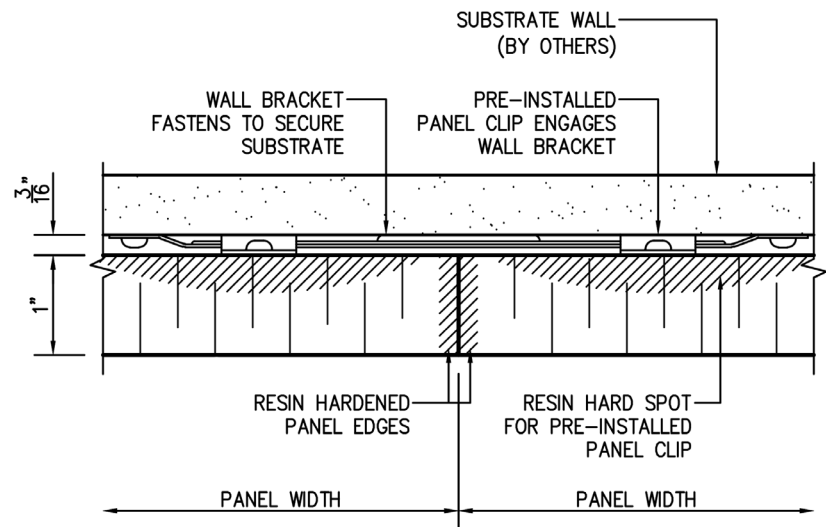

### GENERAL DATA

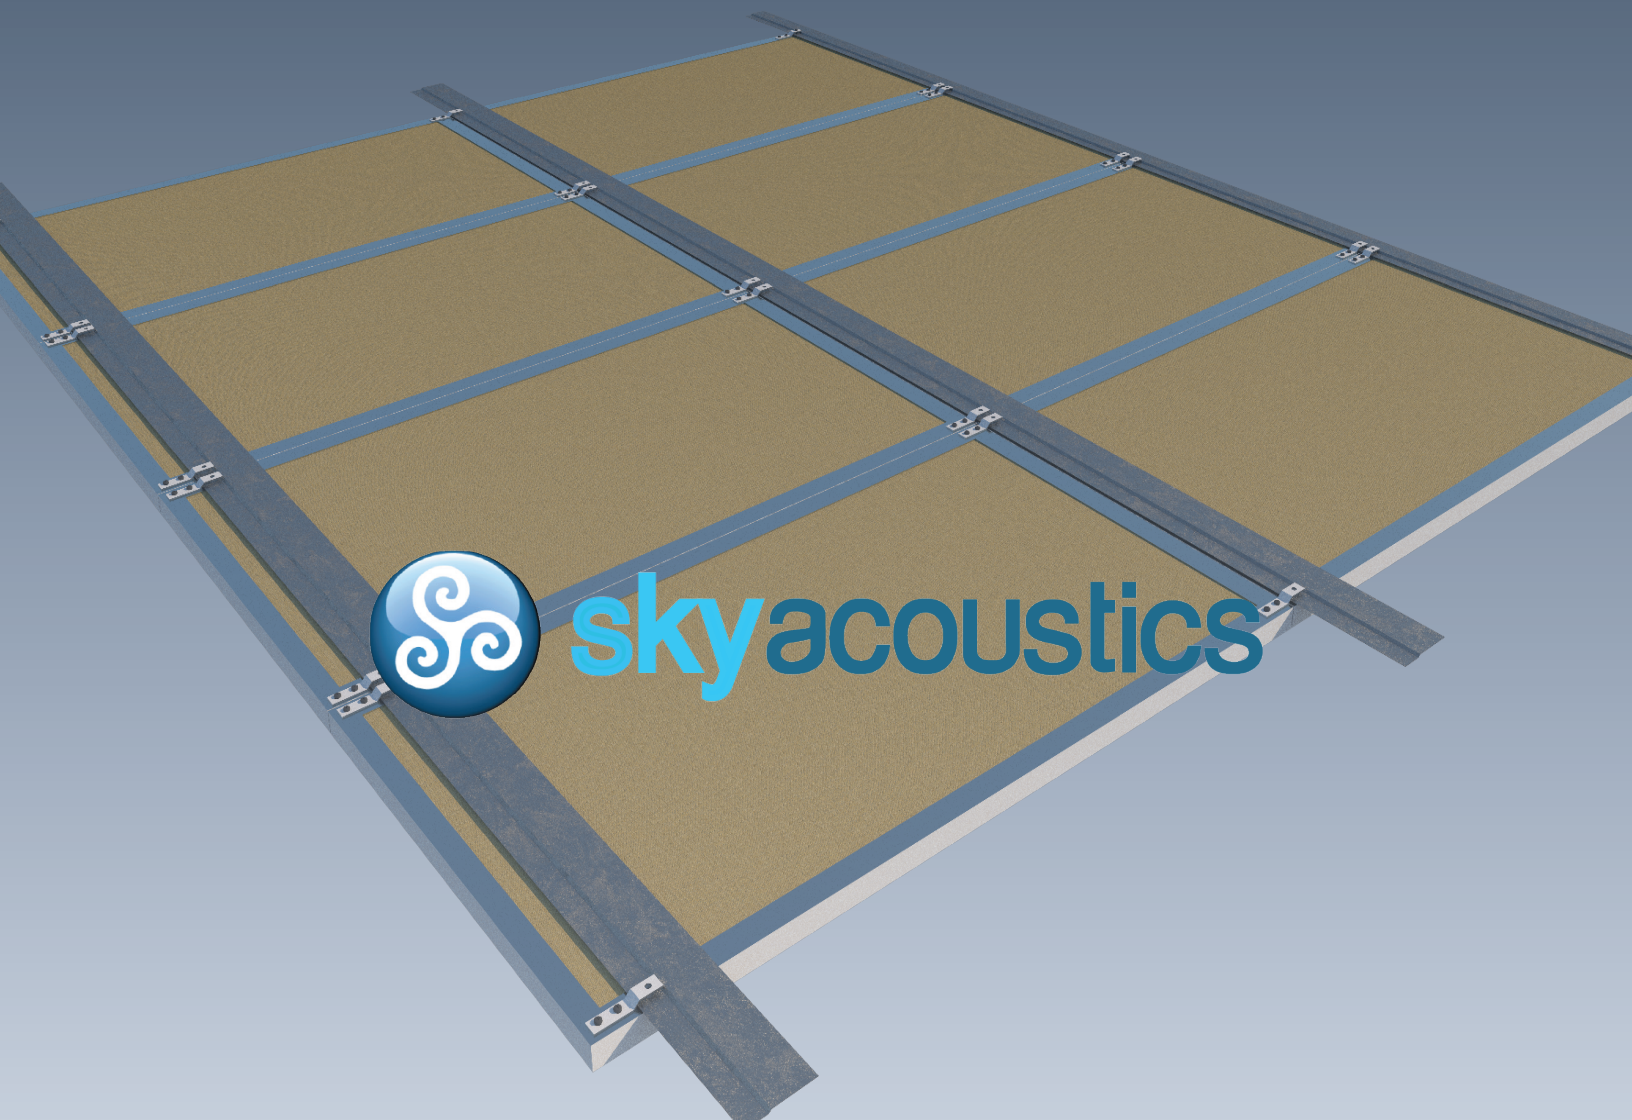

- Minimum 1" reveal at perimeters for Z- Clip engagement
- Any Items or fixtures located in the ceiling must be independently supported (i.e. Lights diffuser and speakers ) .

**NOTE:** Panels are not designed for load

- Speakers, and air grilles are recommended to be visibly mounted at the face of the panel, air movement along these areas can created premature soiling into the panel.
