## MAGNET WALL MOUNT & HOOK AND LOOP

### MAIN COMPONENTS

Hook & Loop

#### HOOK & LOOP

Using a hook and loop mount for acoustical panels provides a versatile, cost-effective solution for sound management.

It allows for easy installation and adjustment of panels on various surfaces without tools. The system supports lightweight to medium panels, making it suitable for both temporary and semi-permanent setups, enhancing room acoustics flexibly.

Magnet

#### MAGNET MOUNT

Using a wall magnet mount for acoustical panels offers a non-invasive, flexible solution for improving room acoustics.

It enables easy installation and adjustment without damaging walls, making it ideal for renters or temporary setups. The system provides secure holding strength and allows for quick reconfiguration to meet changing acoustic needs.
